## CALEY CONSTRUCTION LIMITED

*"I am happy to recommend T B  
Dunn & Co to other construction  
companies as they know the industry  
so well".*

Iain Cameron  
Caley Construction Ltd | Glasgow

Caley Construction Ltd, based in Glasgow provides construction, landscaping and civil engineering services across the region.

Employing over thirty people at any time, the company works with entities such as District Councils to support building projects and major facilities providers under the Private Finance initiative. Iain Cameron, a director of the company operates a quality policy for all the projects they undertake and recently won a BALI award for their standard of workmanship at the Balfron High School project. Iain chooses to work with T B Dunn & Co for all of Caley Construction's accountancy needs.

Iain explains how the business relationship with T B Dunn works for them. "We began working with the partners at T B Dunn & Co when we first established the business. They were recommended to us and we could immediately see at our first meeting that they adopted the same quality principles to their work as we did to ours. The practice provides us with all of the services we need to remain compliant such as audit, year-end accounts and personal and business tax advice. In all aspects of this we find them helpful and responsive".

The construction industry requires specialist

accountancy knowledge to help deal with areas such as sub-contracting, tax and VAT. In working with T B Dunn & co, Iain feels he has found a firm that really understands this market. "We take comfort in the fact that the partners and accounting teams at T B Dunn & Co understand this industry. They are able to provide pro-active advice, which is wholly relevant to construction and takes account of the accounting rules that apply. It's great to know that your accountancy partner is in step with the changing legislation that affects this market and we know that they are on hand to advise us when we need them".

T B Dunn & Co's team recently helped Iain to set up a SASS (self administered pension scheme) which enabled Iain to fund plant development. This he says, "couldn't have been achieved without the expert advice we received from the T B Dunn & Co team. They provided good business advice at every step and took the administrative hassle out of setting up the scheme for us. I am happy to recommend them to other construction companies as they know the industry so well".
